Gain Immediate Insights with consolidated reporting from any DMS; any data source.

Drill down on granular details.

Road Tested Analytics

Leverage proven industry best-practices.

Customize reporting to reflect your business.

Features

Automated Data Refresh

Distributed Email Reporting

Direct Comment Input

Data Driven Alerting

Enterprise-Class Security

DEALER 360

To make smarter decisions, your data needs to be easy to access, use and understand. And that's just not possible with disparate systems, manual reporting or purpose-built canned DMS solutions.

That's why we analyze your business needs first, applying industry insights and best practices to guide you to the right solution and then customize it to your needs. With years of experience in dealership solutions, we will help you aggregate data from every source—implementing solutions that pull data from not only your DMS but all third-party sources such as marketing, CRM and HR systems

CUSTOMER SUCCESS

“Reporting showed we were overstaffed in the sales manager position and understaffed in our F&I positions. Continuously measuring this enabled us to maximize profitability while reducing overall compensation costs, generating an approximate **annual net income improvement of \$2,500,000.**”

“We created a Fixed Ops KPI dashboard to focus on our repair order performance and have seen sharp improvement in total gross generated. This has helped us generate approximately **\$10,000,000 in additional CP gross profit year over year.**”
